- [Hip Impingement in the Indian Population](#)

A Study published by a team of doctors including Dr. Vijay Shetty from Dr L H Hiranandani Hospital. The study was done in collaboration with Moulana Azad Medical College, New Delhi. This is a work carried out on army recruits. The study will help us to know why hip arthritis is so uncommon in India, compared to the west. Also, it provides a platform for future research into primary hip osteoarthritis in India.
